Parts to report

[Part A — Utilities Act](#)

[Part D — Utility licence conditions](#)

Providing data and information to the Commission

Please read the **Utility Licence Annual Report Guideline** for a more detailed instructions on providing relevant and quality information to the Commission.

- All responses should only relate to services provided in the ACT. In the event the licensee is unable to disaggregate ACT services from other jurisdictions, the licensee must provide a statement detailing: area that the dataset covers, brief explanation why data cannot be disaggregated, additional information that may assist the Commission in understanding the approximate percentage of services that are provided in the ACT from the dataset.
- All licensed utilities must provide information and data in the report that are within the reporting period. Data must be provided even if a nil (zero) figure is recorded.
- If the licensee is not able to provide the data or answer a question required in the report, the licensee should indicate 'not available' and provide supplementary information detailing why the information is not available and whether (and in what timeframe) it intends to collect this data.
- In most cases a response of 'yes', 'no', 'not applicable' or a figure will suffice. An explanatory statement or supplementary information (e.g. copies of policies or procedures or a link to material on the internet) maybe required.

- Where data is not available the licensee must provide other data that could serve a similar purpose as the data requested (i.e. data that could equally indicate the level of licensee compliance and identify possible causes of non-compliance). Such data should be clearly identified in the report together with an explanation of the alternative taken.
- The licensee should provide commentary where there is a need to explain key factors relevant to the level of, and trends in, their performance. If the licensee response represents a significant variation in the data from the previous reporting period, additional information is to be provided on the cause(s) of the variation. Any supplementary information can be provided in the comments column, or in an attachment. Where applicable, include measures or actions to be put in place to address or rectify the reported variation. All comments must be put in the comment section box.
